PRESERVING OUR ARCHITECTURAL HERITAGE for 30 YEARS

CONSERVATION ASSESSMENT PROGRAM
HERITAGE PRESERVATION
WASHINGTON D.C

DEADWOOD CITY HALL
INFORMATION & VISITORS CENTER
MT. MARIAH CEMETERY VISITOR CENTER

The City of Deadwood, South Dakota received a Grant from Heritage Preservation to re-assess their materials and artifacts recorded in an earlier Conservation Assessment Program (CAP) Report. Unlike the original CAP, this Grant includes the services of a Preservation Architect to assess and make recommendations on three of the structures housing the City's records and artifacts. Those structures included the historic Fremont, Elkhorn and Missouri Valley Railroad Passenger Station (now the Deadwood Information and Visitor Center), Deadwood City Hall (formerly a planing mill and warehouse), and the Visitor's Center at Mount Moriah Cemetery (formerly a residence). Each of these structures were individually assessed. Recommendations unique for each structure immediately followed the observations at the individual locations. A statement on Climate Control, which is relative for all locations was also part of this assessment
